Target Role: Business Analyst | Consulting | Digital Transformation

PROFILE

MSc Project Management student at Aston University with IT Business Analyst experience across CRM, CMS, mobile app and e-commerce projects for international client teams. Strong foundation in structured problem solving, requirements analysis, process mapping, stakeholder communication, UAT and Agile delivery support. Experienced in translating ambiguous business needs into clear workflows, user stories, functional requirements, testing plans and practical recommendations for business and technical audiences.

CORE SKILLS

Problem Solving & Analysis: Business requirements analysis, issue structuring, root-cause thinking, process mapping, data-informed recommendations

Client & Stakeholder Work: Stakeholder discussions, requirement clarification, cross-functional coordination, user training, senior update notes

Delivery & Product: Agile SDLC, Scrum, Kanban, sprint planning, backlog support, user stories, acceptance criteria, UAT, risk and issue tracking

Tools: Excel, PowerPoint, Jira, Confluence, Trello, MS Project, Power BI, Miro, Figma, Notion, CRM systems

PROFESSIONAL EXPERIENCE

IT Business Analyst | Mplussoft Technology Pvt. Ltd. | Pune, India | Feb 2024 - Mar 2025

- Gathered, analysed and documented business and system requirements for CRM, CMS, mobile app and e-commerce solutions, converting broad client needs into user stories, workflows, functional specifications and testable acceptance criteria.
- Worked with clients, business stakeholders and software delivery teams across India, USA and Australia to clarify scope, resolve requirement gaps and support data-informed delivery decisions.
- Mapped processes and workflows to identify pain points in content management, reporting, admin workflows and mobile operations, then proposed practical improvements to usability and adoption.
- Prepared work product-focused deliverables including functional documentation, process flows, sprint inputs, UAT scripts, training notes and stakeholder update materials.
- Coordinated UAT for 50+ users, helping reduce post-launch issues by 30% and improve release stability.
- Supported sprint planning, backlog discussions, risk and issue reviews and end-user training, improving adoption by 20% and reducing content update time by 40% for CMS/admin users.

Selected project exposure: CRM system, mobile management app, CMS platform and e-commerce admin panel for clients in India, USA and Australia.

Trading Assistant (Night Shift, Part-Time) | Sainsbury's | Sutton Coldfield, UK | Dec 2025 - Present

- Coordinate overnight stock flow, floor planning and operational readiness in a high-volume retail environment, balancing accuracy, speed and changing priorities.
- Collaborate with cross-functional store teams to maintain efficiency, resolve practical issues and keep customer-facing operations ready for trading.

Junior Event Manager | NIEM - The Institute of Event Management | Pune, India | Jul 2020 - Jul 2021

- Coordinated logistics, vendors, timelines and backstage operations across corporate and public events under time pressure and changing priorities.
- Supported large-scale deliveries including Javed Ali Live Concert and Manish Malhotra Fashion Show, building early experience in stakeholder management and operational delivery.

INDEPENDENT PROJECT

Impact IQ - Agile Simulation Game (MVP) | Product Owner & Developer | Web-based project | 2026

- Built a web-based Agile simulation platform to help users understand sprint decisions, delivery trade-offs, stakeholder pressure and practical project risks.
- Defined product features, user flows and functional requirements, then tested and improved the MVP through iterative Agile sprints.
